

Environmental Policy Statement

Ron Sammons Ltd t/a **TECO** Building Products (the 'Organisation') recognises the importance of environmental protection and is committed to operating its business responsibly and in compliance with all legal requirements relating to the design, manufacture and supply of metalwork products to the construction industry. It is the Organisation's declared policy to operate with and to maintain good relations with all regulatory bodies.

The Organisation believes that continuous improvement in environmental management is an essential element within its overall business plan - minimising waste, consumption of resources and pollution goes hand in hand with high productivity and quality standards. The Organisation recognises and accepts its legal duty of care toward the environment and is committed, not only to complying with their legal duties and with other requirements to which we subscribe, but to exceed these requirements, wherever reasonably practicable.

The basis of our environmental management system will be an on-going review of business activities and the identification of aspects of our work that could have an on-going impact upon the environment and the implementation of on-going steps to eliminate, minimise or manage them so that adverse environmental effects are minimised. To enable us to measure our environmental performance we will review the suitability of the Environmental Policy and the performance of the Environmental Management System in order to promote continual improvement year on year in our environmental performance.

It is the Organisation's objective to carry out all measures reasonably practical to meet, exceed or develop all necessary or desirable requirements and to continually improve environmental performance through the implementation of the following:

- Assess and regularly re-assess the environmental effects of the Organisation's activities.
- Assess the environmental effects of our client's business activities as party of our energy management services.
- Training of employees in environmental issues.
- Minimise the production of waste.
- Minimise material wastage.
- Minimise energy wastage.
- Promote the use of recyclable and renewable materials.
- Reduce and/or limit the production of pollutants to water, land and air.
- Control noise emissions from operations.
- Minimise the risk to the general public and employees from operations and activities undertaken by the Organisation.

This policy is communicated to all employees, suppliers and sub-contractors and is made available to the public.
